

Add reliable data capture to your mobile apps and websites

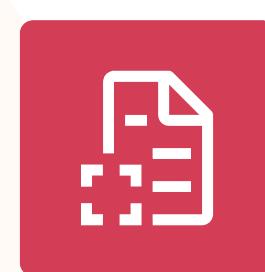

Barcode scanning

Reliably read any barcode symbology in **only 0.04 seconds**.

Even if they're damaged, even in low light.

[Read more →](#)

Document scanning

Let users **easily scan documents** with their smartphones and get **high-quality input** for your backend. Put an end to slow, inefficient document submission and review.

[Read more →](#)

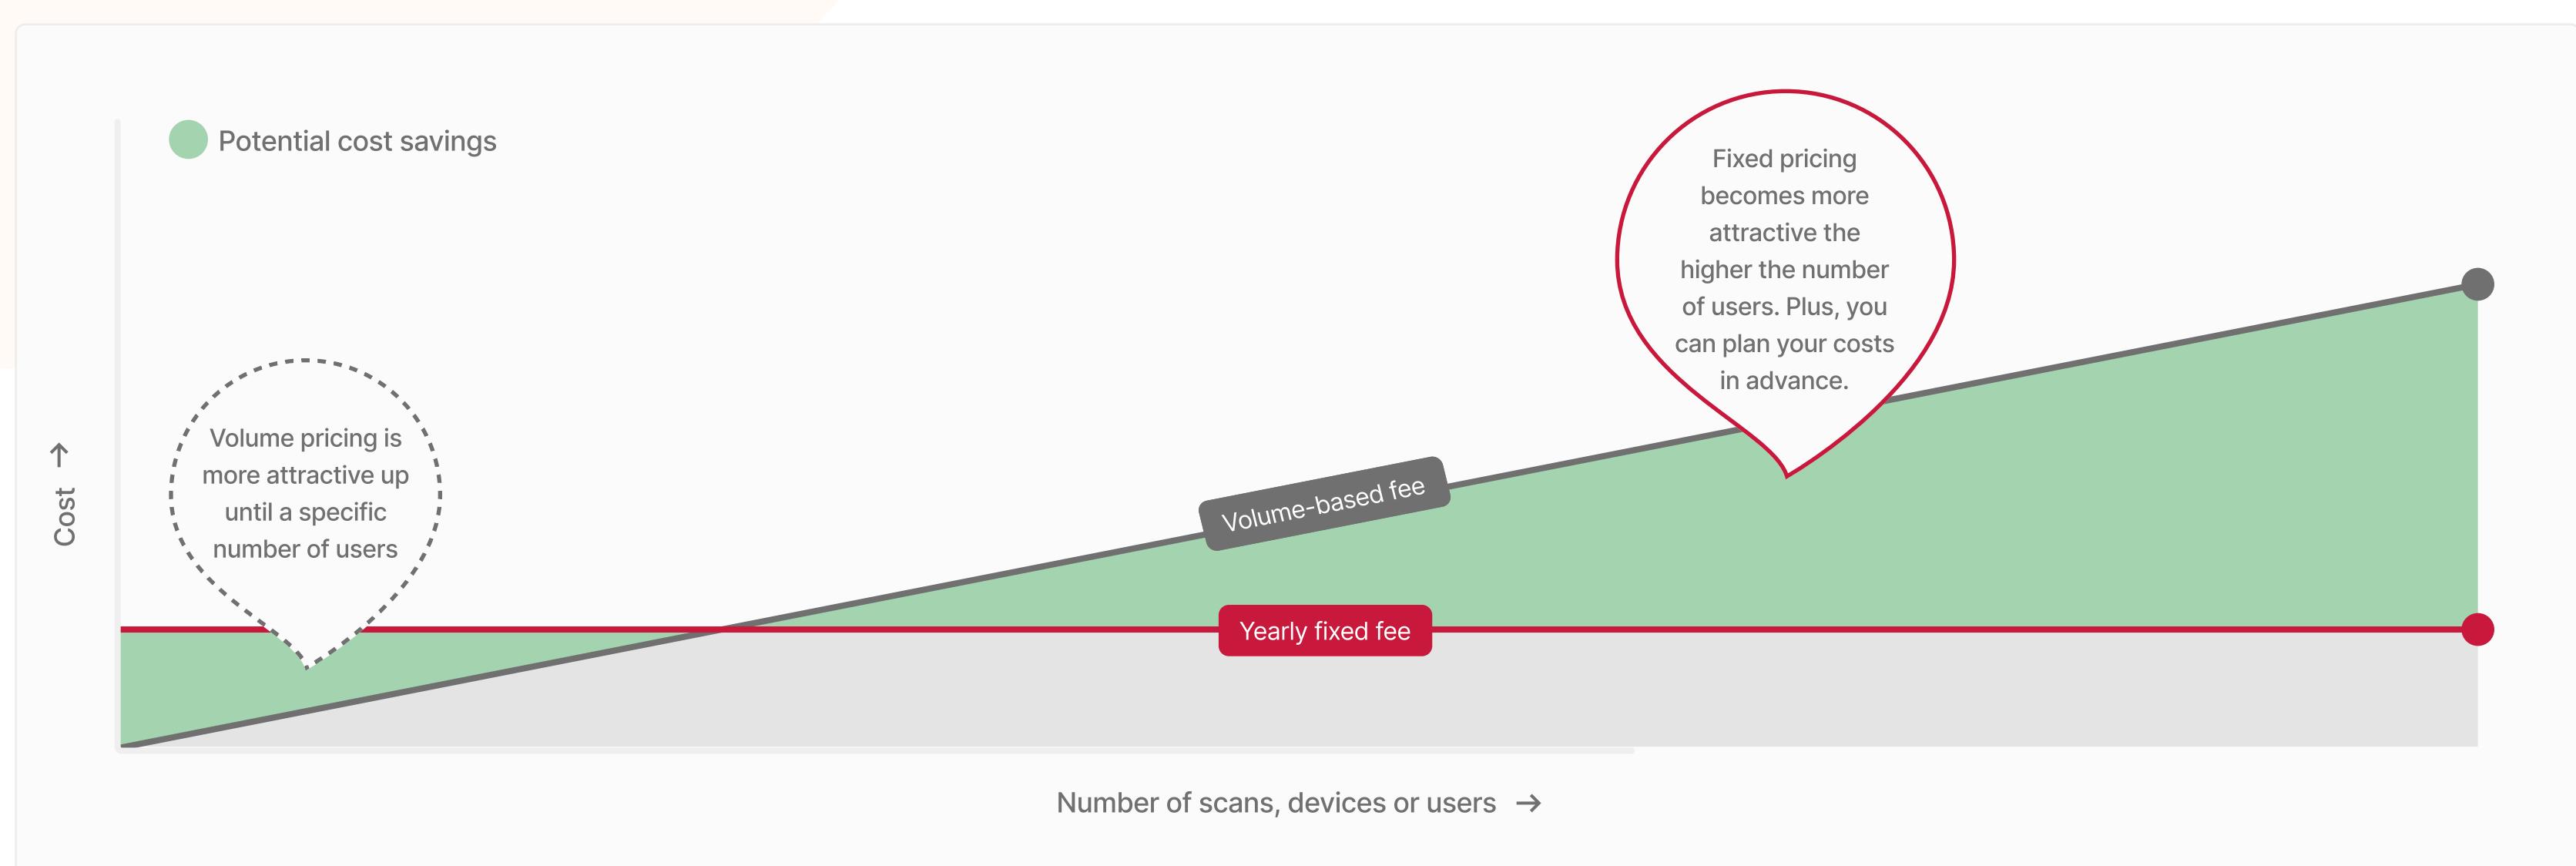

Data capture

Automatically **extract structured data as key-value pairs** from IDs, driver's licenses, passports, VINs, and many other data formats.

Make error-prone manual data entry a thing of the past.
